In the case of modified mortgages with deferred amounts, the outstanding balance of the modified mortgage loan reflects both interest bearing and non-interest bearing UPB amounts. Although we believe that our automated valuation model yields a reasonable approximation of the property's current value, using a value obtained from: (i) a different automated valuation model, (ii) an appraisal based on a physical inspection of the property or (iii) an arm's length sale of the property could result in a different value for the property. At the time of issuance, this field will be disclosed using the most recently available value. This value will be refreshed quarterly and persisted until the next refresh. This value will remain constant beginning in the month in which the loan goes to zero balance. For more information on our proprietary AVM and/or FSD, please visit http://www.freddiemac.com/hve/hve.html.</p> <p>Estimated LTV ratios that are unavailable, less than 1% or greater than 998% will be disclosed as "Not Available," which is indicated by 999.</p> <p>999 = Not Available</p>	In Reference Pool Disclosure Files released prior to May 2018, ELTV ratios that were unavailable, less than 1% or greater than 300% were disclosed as "Not Available," which was indicated by Space(3).

Forecast Standard Deviation (FSD)	<p>In association with the Estimated LTV, the Forecast Standard Deviation (FSD) indicates the accuracy of the estimated value obtained through our proprietary Automated Valuation Model (AVM). FSD is a statistical measure that represents the probability that the AVM value falls within a statistical range of the actual market value, measured against an expected sales price. FSD is expressed as a percentage in decimal form. Although FSD is a proportional measure it can be approximated by a percentage range. For example, FSDs of 0.10 (or 10%) indicate that about 68% (one standard deviation) of actual market sales will fall between +/-10% of the AVM estimated value. The lower the FSD, the smaller the error in predicting actual market value and the greater the accuracy of the value. For more information on our proprietary AVM and/or FSD, please visit http://www.freddie.com/hve/hve.html.</p> <p>If a mortgage loan does not have an ELTV disclosed, then this field will be disclosed as “Not Available.”</p> <p>9.99 = Not Available</p>	Effective October 2019 we will no longer provide FSD.
