The Broker performs some or most of the loan processing functions, such as taking loan applications, or ordering credit reports, appraisals and title reports. Typically, the Broker does not underwrite or service the mortgage loan and generally does not use its own funds for closing; however, if the Broker funded a mortgage loan on a lender’s behalf, such a mortgage loan is considered a “Broker” third party origination mortgage loan. The mortgage loan is generally closed in the name of the lender who commissioned the Broker’s services. • Correspondent is an entity that typically sells the Mortgages it originates to other lenders, which are not Affiliates of that entity, under a specific commitment or as part of an ongoing relationship. The mortgage loan is closed in the Correspondent's name and the Correspondent may or may not service the mortgage loan. The mortgage loan is closed in the name of the lender or its Affiliate and if it is sold to Freddie Mac, it is sold by the lender or its Affiliate that originated it. A mortgage loan that a Broker or Correspondent completely or partially originated, processed, underwrote, packaged, funded or closed is not considered a Retail mortgage loan. • For purposes of the definitions of Correspondent and Retail, “Affiliate” means any entity that is related to another party as a consequence of the entity, directly or indirectly, controlling the other party, being controlled by the other party, or being under common control with the other party. <p>R = Retail B = Broker C = Correspondent T = TPO Not Specified Space = Unknown</p>

In the case of modified mortgages with deferred amounts, the outstanding balance of the modified mortgage loan reflects both interest bearing and non-interest bearing UPB amounts. Although we believe that our automated valuation model yields a reasonable approximation of the property's current value, using a value obtained from: (i) a different automated valuation model, (ii) an appraisal based on a physical inspection of the property or (iii) an arm's length sale of the property could result in a different value for the property. At the time of the security issuance, this field will be disclosed using as the most recently available value. This value will be refreshed quarterly and persisted until the next refresh. This value will remain constant beginning in the month in which the loan goes to zero balance. Estimated LTV ratios that are unavailable, below 1% or greater than 300% will be disclosed as "Unknown," which is indicated by a blank space. 593	4	2	Numeric	<u>FORECAST STANDARD DEVIATION (FSD)</u> – In association with the Estimated LTV, the Forecast Standard Deviation (FSD) indicates the accuracy of the estimated value obtained through our proprietary Automated Valuation Model (AVM). FSD is a statistical measure that represents the probability that the AVM value falls within a statistical range of the actual market value, measured against an expected sales price. FSD is expressed as a percentage in decimal form. Although FSD is a proportional measure it can be approximated by a percentage range. For example, FSDs of 0.10 (or 10%) indicate that about 68% (one standard deviation) of actual market sales will fall between +/-10% of the AVM estimated value. The lower the FSD, the smaller the error in predicting actual market value and the greater the accuracy of the value. If a mortgage loan does not have an ELTV disclosed, this field will be disclosed as Not Applicable. For more information on our proprietary AVM and/or FSD, please visit http://www.freddiemac.com/hve/hve.html . Space(4) = Unknown or Not Applicable

2) SUPPLEMENTAL WLS DISCLOSURE FILE: AGGREGATED POSTAL CODE DISCLOSURE

This supplemental file contains aggregated postal code disclosure for Freddie Mac Whole Loan Securities (WLSSM) Deals. The disclosure will be provided on the WLS Security Data page of Freddie Mac website at the time of issuance of the WLS Deal and will not be updated monthly.

This disclosure is aggregated based on the following disclosure rules:

- The loans within a 5-digit postal code may not represent more than 60% of the loans within the 3-digit postal code; if so, then include those loans in the corresponding 3-digit postal code. For example, if 5-digit postal code of ‘12345’ represents 80 loans out of 100 loans in 3-digit postal code ‘123’, then all 80 loans will be included in 3-digit postal code of ‘123’ instead of disclosing a 5-digit postal code ‘12345’.
- A 5-digit postal code may not contain less than 10 loans; if so, then include those loans in the corresponding 3-digit postal code.
- A 3-digit postal code may not contain less than 10 loans; if so, then include those loans in ‘OTHER’.
- The Aggregate UPB at Issuance for each Postal Code Designation will be rounded to the nearest thousand.
